

# CITROBEX® Feed

Mineral Complementary feed, not acidifier.

It is based on a mix of citrus fruits extract to fight the nutritional oxidative stress

**POWDER**  
READY TO USE

- **Citrobex® Feed** contains substances which reduce the impact of **oxidative stress** that typically accompanies the super-intensive productivity, neutralizing free radicals to support high performance and good meat quality\*
- **Citrobex® Feed** supports the **correct enteric microbial flora\*\***. A proper microbial flora hinders the growth of harmful bacteria such as *E. Coli*, *salmonella*, *clostridium*.
- **Citrobex® Feed** helps to maintain the correct **animal microbiota** who plays a fundamental role on the induction, training and function of the host **immune system**. (Wu HJ, 2012)

## CONTAINS

### Natural extract from *Citrus* spp:

*Citrus aurantium* L., *Citrus aurantium bergamiae* (Bergamot), *Citrus reticulata* (Mandarin) & *Citrus sinensis* (Orange)

A cold extraction from the whole fruits mix, allows the polyphenolic compounds (mainly natural Bioflavonoids) to maintain their natural properties to support a proper gastrointestinal microbiota.

The gut microbiota provides essential health benefits for its host by promoting the elimination of invasive pathogens, while maintaining self-tolerance to avoid autoimmunity. (Wu HJ, 2012)

### Mineral & vegetal Support

Vegetal glycerine  
Clinoptilolite-zeolite  
Whole wheat barley flour

Vegetal glycerine is the carrier of the citrus extraction.

The whole wheat barley flour and the natural clinoptilolite-zeolite provide the solid form and the correct texture to the complementary feed particles.

## RECOMMENDATION FOR USE

Mix the product into the daily ration. The quantity administered can be increased depending on the production phase and at the discretion of the farm technician. Use higher amounts for animals with reduced intake. It is recommended to administer the product regularly to ensure the enough intake of ingredients and appreciate the results.

Animals	Quantity mixed to the complete feed	Use continuously
Chicks	1.0 - 1.5 g/kg	To provide ingredients with an antioxidant effect from day 2
Broiler / Hens	0.8 - 1.5 g/kg	To contribute to the normal and correct balance of the intestinal flora

Packaging:  
20 kg bag

Chicks **will double their weight four to five times in the first six weeks of life.**
